LARGE SLAB DIFFERENCE

The elevation certificate (EC) for the property listed above indicates the building was constructed slab on grade. However, there is a large difference between the top of the slab measurement and the ground elevation, which must be clarified. Please complete the following worksheet, sign, and return it to us.

If the building is constructed slab on grade, document the difference by choosing one of the following:

___ Stem wall slab foundation (perimeter wall poured, and area filled in)

___ Fill dirt used to elevate the building, but the surrounding land remains lower

___ Other: _____

If the foundation has been incorrectly identified and the building is elevated on a crawlspace, please complete the following information.

Crawlspace size (square feet): _____

Number of vents within one foot from ground: _____

Size of vents (height X width or total square inches): _____

Are there vents on more than one side of the building? ___ Yes ___ No

Agent Signature: _____ **Date:** _____
